EDUCATION

Iowa State University

Ames, IA

Bachelor of Science in Computer Science, Minor in Data Science & Applied AI

Expected May 2026

- **GPA: 3.85/4.00**, Dean's List (Jan 2023 – Present), **Top 2% Academic Ranking** (Fall 2022)
- **Certifications:** Prompt Design in Vertex AI (Google Cloud, March 2025), AI Fundamentals (DataCamp, June 2025)

WORK EXPERIENCE

AI/ML Intern

September 2025 – Present

Merrill Manufacturing

Remote

- Researching and configuring AI/ML solutions while evaluating ethical considerations, data security, compliance standards, and performing SWOT analyses of existing tools.
- Deploying enterprise AI tools and identifying applications to solve current manufacturing challenges through proof-of-concept development and solution prototyping.

Database Administrator Intern

May 2025 – August 2025

Uline

Pleasant Prairie, WI

- Optimized **2–3 SQL Server queries weekly**, achieving up to **42% reduction** in execution times, collaborating with the Senior DBA on ongoing performance tuning.
- Created **stored procedures** to detect log reader agent failures and partnered with the ESM team to integrate alerts into Nagios, **improving replication visibility**.
- Handled **20+ database operations** including permission management, backups and UAT restores, stored procedure deployments across SYS/UAT/PROD, SSRS uploads, and automated tasks using **VBScript**.

Lead Computer Science Tutor

Aug. 2023 – May 2025

Iowa State University Help Room

Ames, IA

- Led group tutoring sessions (4–5 students) across six CS courses, including **Data Structures, OOP in Java, Discrete Math, and Algorithms**.
- Helped 15–20 students master key data structures and algorithms, boosting exam scores by **10–15%**.
- Guided 30+ students in Java OOP, increasing project completion rates by **10–20%**.

PROJECTS

[Crypto Analytics Platform](#) | Go, React, TypeScript, Cassandra, Docker, AWS EC2

June 2025 – August 2025

- Architected scalable microservices backend using Go and Cassandra, processing **10k+ records/week** and enabling sub-second queries on time-series crypto data.
- Developed **automated ETL pipelines** and real-time dashboards on AWS, ensuring **99.9% uptime** and supporting seamless multi-cloud scalability.

[School Subject Assistant](#) | Python, Redis, Pinecone, JavaScript, HTML, CSS, AWS, Docker

Aug 2025 – Sep 2025

- Built a full-stack AI Q&A system for statistics using **1,000 PDF pages**, **Pinecone vector search**, and **Gemini embeddings** for context-aware solutions.
- Deployed a **serverless architecture** (**Docker → AWS ECR → AWS Lambda → API Gateway**) with **Redis session memory**, achieving **700–800 ms** per query for real-time multi-user interaction.

[E-commerce Phone Store](#) | React, JavaScript, Node.js, Express.js, MongoDB

March 2025 – May 2025

- Collaborated to build a full-stack e-commerce web app, implementing core features including **product listing, cart management, and checkout workflows**.
- Built responsive interfaces with **form validation** and engineered backend **REST APIs** with MongoDB integration to handle authentication, product posting, and real-time cart updates.

[AI-Powered Note-Taking App](#) | Java, Spring Boot, MySQL, WebSockets, CI/CD

August 2024 – December 2024

- Designed backend infrastructure using **Spring Boot** and **MySQL**, optimizing data retrieval by 20%.
- Integrated OCR functionality with **Tesseract API**, achieving 90% text extraction accuracy.
- Collaborated to develop real-time live editing features via WebSockets, reducing latency by 30%.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, Go, HTML, CSS

Databases: MySQL, MongoDB, SQL Server, Cassandra, Redis, Pinecone

Cloud/DevOps: Docker, CI/CD, AWS (S3, EC2, ECR, Lambda, API Gateway)

Frameworks/Tools: SpringBoot, React, FastAPI, Express, Node
