EDUCATION

M.S. in Computer Science

Georgia Institute of Technology

Starting Fall 2026

Atlanta, GA

B.S. in Computer Science, Minor in Data Science & Applied AI

Iowa State University — GPA: 3.88/4.00

August 2022 – May 2026

Ames, IA

WORK EXPERIENCE

Associate Database Administrator

Uline

06/26 – Present

Waukegan, IL

AI Software Engineering Intern

Merrill Manufacturing

09/25 – 05/26

Remote

- Engineered a full-stack Agentic AI assistant using React, Flask (Python), SuiteScript, PostgreSQL, and NetSuite's **LLM module**, enabling employees to query **live ERP data** in natural language.
- Built a **Retrieval-Augmented Generation** system over a product catalog enabling natural language querying for product information with end-to-end retrieval latency under **15 seconds**.
- Created a **NetSuite Map/Reduce automation** to reconcile item receipts with carrier billing data, reducing manual reconciliation effort and improving workflow efficiency by **20%**
- Developed an internal **MCP server** for Claude usage observability across **15–20 employees**, logging interaction metadata, request metrics, and estimated token usage to support operational monitoring.

Software Engineer (Senior Capstone Project)

Perpendo AI

01/26 – 05/26

Remote

- Collaborated with a team of 4 to develop an MVP of an **agentic AI platform** to process insurance underwriting documents and automate **risk evaluation** using LLM-driven reasoning.
- Implemented automated **CI/CD pipelines** for services deployed across **AWS (EC2, DynamoDB, Lambda, API Gateway)**, enabling production updates and infrastructure changes to be deployed within **15 minutes**.

Database Administrator Intern

Uline

05/25 – 08/25

Pleasant Prairie, WI

- Optimized **2–3 SQL Server queries weekly**, achieving up to **42% reduction** in execution times, collaborating with the Senior DBA on performance tuning.
- Created **stored procedures** to detect log reader agent failures and partnered with the ESM team to integrate alerts into Nagios, improving replication visibility.
- Handled **20+ database operations** including permission management, backups and UAT restores, stored procedure deployments across SYS/UAT/PROD, and SSRS uploads

PROJECTS

Crypto Analytics Platform | Go, React, TypeScript, Cassandra, Docker, AWS EC2

06/25 – 08/25

- Built scalable microservices backend using Go and Cassandra, processing **10k+ records/week** and enabling sub-second queries on time-series crypto data.
- Developed **automated ETL pipelines** on **AWS EC2** and deployed real-time dashboards on **Render**, maintaining **99.9% uptime** for continuous data processing and visualization.

AI-Powered Note-Taking App | Java, Spring Boot, MySQL, WebSockets, CI/CD

08/24 – 12/24

- Built backend infrastructure using Spring Boot and MySQL, **optimizing data retrieval** by 20%.
- Integrated OCR functionality with Tesseract API, achieving 90% text extraction accuracy.
- Developed **real-time** live editing features via WebSockets, allowing multi-user sessions.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, Go

Frameworks/Tools: SpringBoot, React, Express, Node, Flask, SuiteScript, LangChain

Databases: MySQL, MongoDB, SQL Server, Cassandra, Redis, PostgreSQL

Cloud/DevOps: Docker, CI/CD, AWS (S3, EC2, ECR, Lambda, API Gateway, DynamoDB)

AI/LLMs: LangChain, RAG, MCP, Prompt Engineering, AI Agents
